MIQUEL VERA RAMIS

FULLSTACK DEVELOPER

+2 years experience in both education and industry. Specialized in building full-stack web applications combining diverse technologies seamlessly. Dedicated to creating clean, maintainable, and future-proof code.

WORK EXPERIENCE

Higher Education Instructor in Web Application Development at Politècnic de Llevant

October 2023 - Present

RESPONSIBILITIES

- Teach programming subjects focused on fullstack web applications using Laravel and development tools like GitHub
- Develop and maintain existing web applications for the high school in React, ensuring they meet current educational needs and standards
- Lead students in their final group projects to build full-stack real-world applications within a three-month deadline

KEY ACCOMPLISHMENTS

- Increased by 38% the number of first-year students passing the programming subject, compared to previous years, while being recognized for my ability to explain complex concepts and make them easy to understand.
- Achieved a 95% internship-to-job offer rate among my second-year students, demonstrating their business readiness and the effectiveness of my preparation
- Demonstrated leadership and organizational skills by coordinating project timelines, setting milestones, and ensuring students met their deadlines

Full Stack Developer at Tribalyte Services

September 2022 - September 2023

RESPONSIBILITIES

- Develop full stack applications, mainly focused on frontend technologies using Angular, React, Tailwind and Bootstrap; appended to a Node.js, SQL, and Express
- Code tests with Cypress and integrate them in Bitbucket pipelines to ensure software quality

KEY ACCOMPLISHMENTS

- Launched Ipatia, a cloud-hosted web platform built in Angular, which allows businesses to efficiently manage deadlines, tasks and information related to the organization's industrial property portfolio.
- Developed a rail system monitoring and management application for ALSTOM, utilizing React to enable real-time tracking and operational data management

Full Stack Developer at Noster Economia

October 2021 - June 2022

RESPONSIBILITIES

- Develop a financial full stack application

KEY ACCOMPLISHMENTS

- Launched analisisfinancierosectorpublico.com, a financial data analysis web app about Spanish public entities using full-stack technologies including PHP, vanilla JavaScript, and SQL databases; including the creation of an API.

SKILLS

- ✔ Fast learner
- ✔ Agile principles
- ✔ Problem solving
- ✔ Optimizing Performance
- ✔ Maintainable Code
- ✔ High Test Coverage
- ✔ Task Management
- ✔ Active listening
- ✔ Communication
- ✔ Impact Orientation

- ✔ Creative
- ✔ SQL
- ✔ JavaScript
- ✔ TypeScript
- ✔ PHP
- ✔ HTML
- ✔ CSS
- ✔ Laravel
- ✔ React
- ✔ Angular
- ✔ GitHub

- ✔ REST API
- ✔ CI/CD
- ✔ Back-End Web Development
- ✔ Front-End Web Development
- ✔ Object-Oriented Programming (OOP)
- ✔ Test-Driven Development (TDD)

EDUCATION

Bachelor's Degree in Computer Engineering at Universidad Complutense de Madrid

LANGUAGES

Spanish, Catalan and English
